- | | | | |
|----|---|----------------------|--------------|
| 1 | Gas to filter: | | |
| 2 | Gas features: | * Viscosity: | * Density: |
| | | pH: | Temperature: |
| 3 | Class of contaminant to remove: | | |
| 4 | Processing flow rate (m ³ /hour) | Minimum | |
| | | Medium | |
| | | Maximum | |
| 5 | Average volume | Daily | |
| | | Monthly | |
| 6 | Solids load (mg/litre): | | |
| 7 | Admissible filtration cycle: | | |
| 8 | Load loss (bar) | Initial | |
| | | Final | |
| 9 | Working pressure: | | |
| 10 | Required filter grade: | | |
| 11 | Equipment is needed for: | Contaminants removal | |
| | | Solids recovering | |
| | | Gas scrubbing | |
| | | Other (describe) | |
| 12 | System description: | | |

Note: finding distinct with * must write data about working temperature.
